

Order form and species selection

Customers, please take this form to your chosen nursery to select species.

It is recommended you speak to the nursery regarding species and availability prior to paying for your plants at Council's Customer Service Centres or online.

Orders are to be placed from 1 July or until the scheme is fully subscribed. Council reserves the right to suspend the Rural Tree Scheme.

Common Tussock-grass	<i>Poa labillardieri</i>	Grass	<1	sl/l/cl	D	Throughout

Common name: The name the plant is commonly referred to. There may be multiple common names per plant.

Species name: The botanical name used to describe a plant. There is only accepted botanical name per plant.

Height: Tree heights will vary per site; heights are given as an indication of the species potential.

Soils: Indicates the soil type/s each plant is best suited to: **s** = sand, **sl** = sandy loam, **l** = loam, **cl** = clay loam, **c** = clay

Sites: **I** = irrigated land. **W** = wet, waterlogged or depressions areas or areas that are wet because of excess irrigation water in summer, or hold water during the rest of the year. **S** = saline discharge areas, areas that are salt affected can often be identified by the loss of white clover and dominance of salt tolerant plants (such as Barley grass). **C** = check bank plantings or irrigated shelter belts (areas where irrigated perennial pasture is growing well). **D** = Dryland, plants with some drought tolerance, suited to the dry periods across the plains.

Orders must be in multiples of 10 per species

Note to Landholders:

Through your payment of your plants, you agree to plant and tend for the trees, shrubs and ground covers. You may be subject to a site visit for monitoring purposes to confirm the planting has been completed.

2022 Nursery Voucher
