***Silage Wrap** - must be loose and clean to be accepted at the Echuca and Mount Scobie (Kyabram) Resource Recovery Centres.

****Tyres** require disposal through specialised recyclers, there is a cost associated with recycling and transportation. Tyres with steel rims attached or those contaminated with soil or other materials are charged at a higher rate (approx. double).

*****Whitegoods** must be able to be loaded into steel skips at all centres (except Echuca and Mt Scobie) to be accepted.

Note: For materials to be recycled, they must be sorted. Unsorted or contaminated recyclables will attract a fee and will be sent to landfill.
