

ROAD MANAGEMENT PLAN

The inclement weather conditions and flooding event experienced throughout the municipality in October 2022, created conditions that are not suitable for maintenance grading and have resulted in lost time for maintenance grading.

Therefore, Council is temporarily unable to comply with the Plan. Accordingly based on Section 83 and 84 of the Victorian Wrongs Act, Council has suspended the Plan to extend response times to undertake maintenance grading. The suspension is effective from 30 April to 31 October 2023 for some flood impacted gravel and earthen roads and to 31 March 2024 for some flood impacted sealed roads. Council will continue to work on roads that have not been impacted by the inclement weather and flooding event and the municipality considers it safe and reasonable to do so.

For full details of alterations to the Road Management Plan and the affected roads, visit Council's website or any Customer Service Centre.

DEFECT	RESPONSE TIME		EXTENDED TO 31 March 2024
	COLLECTOR ROAD	ACCESS ROAD	
SEALED ROADS			
Sealed road shoulder drop off. Edge of seal drop \geq 80mm for \geq 20m length	50 days	60 days	Addressed as conditions, resources and priorities allow

DEFECT	RESPONSE TIMES		EXTENDED TO 31 October 2023
	COLLECTOR ROAD	ACCESS ROAD	
GRAVEL ROADS			
Corrugation Corrugations \geq 25mm in depth for a length \geq 500m or the full asset segment (whichever is shorter) or \geq 25mm in depth for 50m at an intersection	45 days	90 days	Addressed as conditions, resources and priorities allow
Deformation (Rutting) \geq 100mm depth over 25m length. (Use 3m straight edge from centre line to edge of seal to assess.)	45 days	90 days	Addressed as conditions, resources and priorities allow
Potholes \geq 500mm diameter and \geq 100mm depth or more than 10 potholes in 10 linear metres.	25 days	30 days	Addressed as conditions, resources and priorities allow
EARTH ROADS			
Rutting \geq 150mm depth \geq 25m length. (Use 3m straight edge from centre line to edge of road formation to assess).		120 days	Addressed as conditions, resources and priorities allow
Washouts / erosion Depressions that are \geq 250mm deep \geq than 1m length.		120 days	Addressed as conditions, resources and priorities allow
