

Rushworth Streetscape Renewal Works

FAQ / Info sheet

Stage 5 and 6 of the Rushworth Streetscape project are scheduled to begin on 19 February, and will see road pavement works taking place on both the east and west sides of High Street.

Why are road pavement works happening?

The road pavement works provide a much needed upgrade in Rushworth and will fill existing potholes and other road hazards along the road surface in High Street.

How long will the road be closed for?

The road will be upgraded in stages, but residents can expect the works to take place over a 5 – 6 week period. While there will be some inconvenience, the end result will complete the Rushworth Streetscape works in the CBD.

Each side of High Street will be closed to oncoming traffic while the road is being repaved. The west side of High Street will be completed first, followed by the east side. Only one side of High Street will be constructed at a time to provide some vehicle movement and parking.

What detours and temporary parking are you putting in place?

During this time there will be detour routes in place for residents and temporary parking will be available along Parker Street.

Residents should also be aware that during the road pavement works on the east side of High Street, the best parking for IGA will be along Wigg Street and the service station will not be accessible from High Street.

Can I cross High Street while the road pavement works are taking place?

No, there will be no pedestrian or vehicle access to cross the street from one side to the other, except on Moora Road and Wigg Street. Please be aware and park accordingly. Fencing and signage will be installed during this time. Please observe and obey all signage.

Will the works be finished in time for the Easter Heritage Festival?

Works are still expected to be completed prior to the Easter Heritage Festival, pending any major weather disruptions.

How can I find out more information about this project?
