

# Waranga Rail Trail

## Project Update - Sept 2024

Construction of the final stage of the Waranga Rail Trail, linking the towns of Rushworth and Murchison, is soon to commence. Council recently awarded Northern Construction Group the contract to build approximately 10km of gravel cycling trail, from the Bendigo - Murchison Road crossing to Channel Inlet Road. The works also include repairs to six VicTrack bridges, path drainage, culvert and safety barrier installations and signage.

Works on this stage are scheduled to commence this month and be completed by April 2025. Please note that large areas of the railway reserve will be flagged off for construction purposes and traffic management will be in place to ensure safe construction access from the adjacent roads. Please obey all construction signage

If you have any questions or concerns, please contact Campaspe Project Manager Paul Arthurson using the details listed below
